Announcement Regarding Commission Rankings for Grower and Processor Applicants

The Maryland Medical Cannabis Commission is releasing the 1 through 20 Grower and 1 through 30 Processor names with their Commission rankings (see list below). There were many highly-qualified Grower and Processor applicants; however, the Commission was limited to granting up to 15 Grower pre-approvals due to statutory limitations issued by the legislature. The Commission temporarily limited the number of Processor pre-approvals to 15 due to resource management. Five extra Grower applications and 15 extra processor applications were voted on to be pre-approved should any of the pre-approved entities not result in final licensure. Beginning June 1, 2018, the Commission will review supply and demand and may be able to issue more licenses if necessary, based on the need.

Towson University's Regional Economic Studies Institute ("RESI") was enlisted by the Commission to review, evaluate and rank the applications received from interested applicants. RESI employed and the Commission adopted a double-blind review process. The top ranked 20 Grower and top ranked 30 Processor applications were voted on only by coded number prior to the de-coding process. The other RESI rankings (rankings from the twenty-first ranked application to the 145th application for Grower, and thirty-first to 124th or Processors) have not been de-coded nor voted on by the Commission.

As a reminder, the pre-approved entities announced on August 15 have not been issued licenses. They will undergo extensive background checks, financial due diligence, and inspections in the next phase of a two-stage approval process.
